In the space below or on a separate sheet of paper, please begin to plan out your robot. Draw and label the components, important features (like bones & muscles), and a how the robot will actually move. You must get your plan approved before you can start to build.

Plans are flexible and sometimes need to change!
Arts and Bots Planning Schematics

In the space below, please storyboard your presentation. Draw what will be happening with your robot and briefly explain what key point is being made. You do not need to have this part done to start building, but should have it done within two days of starting building.

Plans are flexible and sometimes need to change!
