

# SHADOW THROWER

1. Draw a circle on a piece of paper by tracing the end of the cardboard roll. Cut that circle out.
2. Design or trace the shape you would like your shadow thrower to project. Cut the spooky shape out of the center of your circle.
3. Tape a sheet of aluminum foil to the inside of your cardboard roll; lining it completely.
4. Tape your paper circle to one end of your cardboard roll.
5. Insert your single or tri-color LED light through the opposite end of the cardboard roll.
6. Program your LED light.

Take your shadow thrower into a dark room and enjoy!
